

**GINFIZZ**

# Hybrid Oilseed Rape

## Yields

Ginfizz is a new RL candidate variety from the RAGT breeding programme. It is a consistent and high gross output hybrid with an excellent overall agronomic package. It is suited to all soil types and farm situations in the east and west regions and has given very consistent performance over two contrasting seasons.

## Agronomy

Ginfizz offers growers an excellent agronomic package, with good and durable phoma resistance which translates into a high level of resistance to stem canker (7). It is relatively short, with good standing power and medium-early flowering and maturity. Its early maturity ensures that more of the potential locked up in the crop is realised on-farm and helping with harvest management ahead of following wheat crops.

	GINFIZZ	Excalibur	Flash	Vision	Cabernet
Resistance to lodging	8	6	7	7	8
Stem stiffness	7	5	5	7	8
Height (cm)	149	147	157	146	148
Earliness of flowering	7	7	5	5	4
Earliness of maturity	7	7	6	6	6
Light leaf spot	5	6	5	5	6
Stem canker	7	6	5	6	7
