VARIETY PROFILE

Morphology

- medium plant height
- semi erect leaves
- low ear insertion

Components of yield

Number of rows	14
Number of grains per row	24 - 26
Pollination	excellent

Characteristics

- stay green variety
- early flowering
- good lodging resistance
- high feeding values

ADAPTATION

Favourable ++++

Less favourable +++

RGT EXXTENS

YIELD

t/ha
16.1

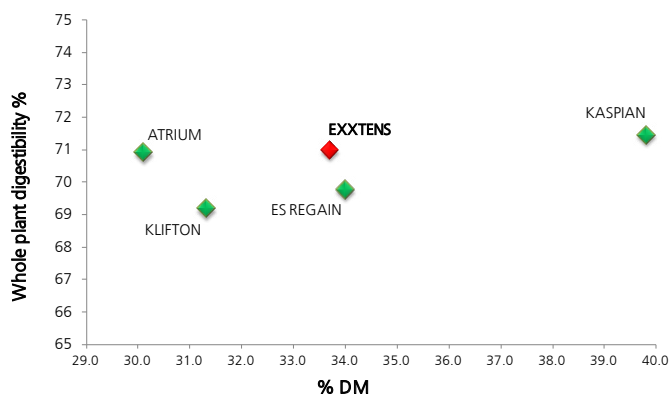

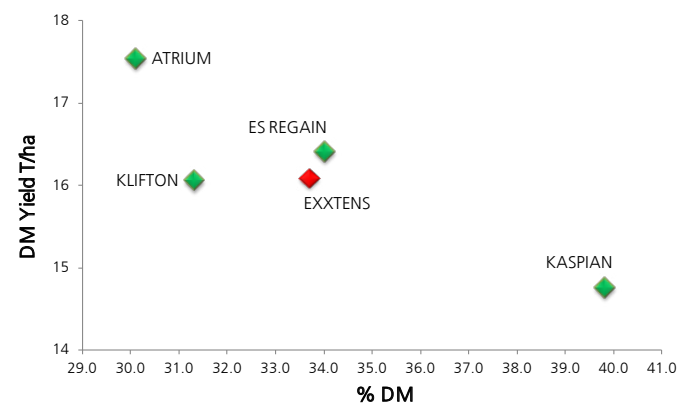

Dry Matter Yield

SUMMARY

EXXTENS is a high yielding, early maturing variety suitable for both favourable and marginal sites. It has good starch and ME levels and has one of the highest digestibility figures of all varieties in trial, making Exxtens a must have variety for beef and dairy units.

	Whole Plant Digestibility %	Whole Plant Starch Content %	Cell Wall Digestibility %	ME
EXXTENS	70.99	32.00	57.43	11.36
KLIFTON	69.22	31.53	55.53	11.08
ES REGAIN	69.76	33.12	55.23	11.16
KASPIAN	71.45	37.94	55.10	11.43
ATRIUM	70.93	30.34	58.16	11.35
