

GTA Suite Registration

Registering Your Software

To be able to use the GTA Suite you must first register the software along with the owner's details, please see below. This process is completed online via the use of "Registration Numbers" issued by AGCO; these are either automatically or manually entered into the software using one of the following processes.

Open the GTA Suite program, the "Registration Wizard" below will be shown the first time.

There are four options available for registration to be completed:

First option is recommended and allows an online registration, for users with Internet access.

Second option provides a printed form for mailing or faxing to a dealer for assisted online registration if you do not have access to the Internet.

Third option provides a web based registration form, for users with Internet access. Can be used if connection problems occur with first option.

Fourth option assumes registration has been done by either the second or third option above and allows the registration numbers to be installed.

Click on the appropriate "Button" and click "Next" to continue.
