

Ten Solid Reasons to use Liquid Fertilisers :-

Accuracy – up to, but not into the field margin

Precision – down to the last litre per hectare

Solubility – our liquids are 100% soluble

Storage – bulk liquids in tanks release buildings for more profitable uses

Labour – one man operation

Handling – liquids are pumped, not humped, so are safer to handle

Machinery – one sprayer, two jobs - no forklift, tractor and trailer

Waste – no bags to burn

Safety – liquids are not a fire hazard

Timing – apply liquid fertiliser when too wet to spray pesticides

Whatever the problem, we offer Solutions

Straights — High N+S — Micronutrients

Foliars — Suspensions — Compounds
