Coarse Screened Limestone

Product Description

Sedimentary rock consisting largely of calcium carbonate and containing not more than 15% of Magnesium expressed as MgO , The grading of the material falls within the declared value and permitted tolerances of a Coarse Screened Limestone as defined by the Fertiliser Regulations 1991

Technical Information

Constituent	Test Method	Typical / Declared Value	Permitted Range
Magnesium Oxide Content	BS 6463 : Part 102	0.5	0 - 15
Calcium Oxide Content	BS 6463 : Part 102	54	
Neutralising Value	BS 6463 : Part 102	55	50 - 60

Typical Particle size Distribution *(Tested to BS EN 933-1)*

BS/EN Sieve Size	Declared Value	Permitted Range
6.3mm	100	
5mm	99	95 - 100
4mm	95	
3.35mm	89	85 - 95
2mm	72	
0.150mm	18	> 15
