Autumn Show & Sale

on

Saturday 20th October 2018

Show Judging at 10:00am

Sale will begin at 12 Noon

at

Newark Livestock Market, Great North Road, Newark,
Nottinghamshire, NG24 1BY Telephone: 01636 676741

The Lincoln Red Cattle Society Members are pleased to offer:

6 Bulls

36 Females comprising:

In calf cows with calf at foot; in calf heifers & maidens

Information correct at time of going to print

Important Notice to Prospective Purchasers:

Settlement in full is due immediately at the close of the Sale. No animal may leave the Sale Premises without an official "Pass Slip", obtainable only from the Auctioneers upon settlement.

When you purchase Lincoln Red Cattle:

Please collect the animal's Pedigree Certificate from our Secretary who will be in the Auctioneer's Office, during the Sale. To transfer the animal(s) into your Herd, detach the Transfer Certificate from the bottom of the Pedigree Certificate and either hand it to our Secretary along with the transfer fee(s) at the Sale, or post with a cheque to the Lincoln Red Cattle Society. Our transfer fee is £12.00/animal (incl of VAT).

We welcome new members to our Society and in order to register your Lincoln Reds you need to be a member. Please speak to our Secretary:

Premier Waltzing Matilda W035 is very well grown for her age. She has a lovely quiet nature and a true deep red coat. Her dam is one of the milkiest cows in the Herd. Her Sire: St. Fort Stirling was the first son offered for sale by the 18,000gns Beverley Noble. She has been individually tested for IBR & Lepto.

Has been run with cows for 2 years, has bred some very good calves and is now coming back on his daughters. He is very quiet. He was Shown successfully in 2015.

NOTES

Johne's Disease Risk Level Reminder - CHeCS

If you are looking to buy or sell stock it is important to know your own herd's Johne's disease risk level, as well as that of any cattle that you might add to your herd.

Level 1 – There have been at least three clear annual herd tests and there is a Johne's Disease herd health plan in place. This is the lowest level of risk

Level 2 – There has been at least one clear herd test but the herd does not yet qualify for Level 1 status. There is a Johne's disease herd health plan in place

Level 3 – Three per cent or less of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 4 – More than three per cent of the herd were identified as reactors at the most recent herd test. There is a Johne's disease herd health plan in place

Level 5 – This includes herds without a health plan for Johne's disease, herds that not adhere to the mandatory elements of the health plan and herds that do not carry out the required testing. This is the highest level of risk

PLEASE NOTE: IMPORTANT RULE ABOUT BUYING AND SELLING AND RISK STATUS!

It is important to remember that if an animal of a lower risk level status is added to your herd, if it is ever sold on from your holding it must be sold as its original risk level status (i.e. a Risk Level 3 animal added to a Risk Level 2 herd must remain as Risk Level 3 if sold again).

However, animals added from a higher Risk Level Status herd to a lower Risk Level Status herd take on the status of the herd that they are added to and must be sold as such (i.e. a Risk Level 1 animal added to a Risk Level 4 herd would then have to be sold as Risk Level 4 in the future).
