

Baler Belts

The agricultural farming industry is one we are able to service with replacement conveyor belts for a wide range of machinery with a particular focus on Baler belts (Round Baler Belts).

Material Properties

- Multi-ply layers for maximum strength
- Polyester inner core for lateral stability
- Extra strength for continual flexing around rollers
- High strength fasteners

Applications

We offer varying styles of belts that fit straight on to machines such as, Bamfords, John Deere, Farmhand, Hesston, Greenland, Massey, New Holland, Vermeer & Vicon.

Features / Benefits

We use the highest quality fasteners from Flexco and Mato for an optimum and reliable life span.

Our baler belts are manufactured using only the highest quality materials and we don't compromise for lower cost versions that may be offered by other suppliers.

Additional Information

- Availability: This material is available ex stock and can be supplied at any width up to 1000mm wide.
- Techbelt manufactures 3 ply rubber baler belts to suit any type of round baler available on the market today. We can make belts to suit machine such as New Holland, John Deere, Vicon, Claas, Heston, Massey Ferguson, Vermeer and Welger. If your machine isn't mentioned give us a call with the size and we can custom make a baler belt to fit your specific needs.
- All our round baler belts are made to order here at our UK facility using the highest quality sourced materials from our trusted manufacturing partners in the EU
